

I understand there is a possibility that LPFM stations may be given priority over existing FM translators. I am very concerned that these services may remove the current stations such as K-LOVE. K-LOVE is a great family oriented/safe radio station. There are VERY few of those available to us. K-LOVE also provides community event notification for family oriented local events that would be lost if K-LOVE were not broadcasting. I ask that you put aside the idea of expanding the LPFM stations priority over existing FM translators. Thank you
